Nisse uses Security Token as authentication method.

Nisse enter his TeliaSoneraID, Nisse1.

He enters his password "a!1M&%!2b".

He uses his PIN code to get a one-time passcode from his security token.

The security token displays "50H204" and Nisse enters the result under "Passcode".

Karin uses SMS and PIN code as authentication method.

Karin enters her TeliaSoneraID, karin1.
Then she enters her password "1b&%!C78a".
She then clicks the "Sign In" button.

If TeliaSoneraID and password is correct a one-time passcode will be sent to the mobile phone registered to the username provided.

A flash SMS with the one-time passcode will, normally, be delivered within 30s.

Login with Flash SMS and PIN code, second page**TeliaSonera web access**

Enter SMS Passcode directly followed by your PIN code

Enter the received SMS passcode directly followed by your personal PIN code.

Example, SMS Passcode

**TeliaSonera web access**

Enter SMS Passcode directly followed by your PIN code

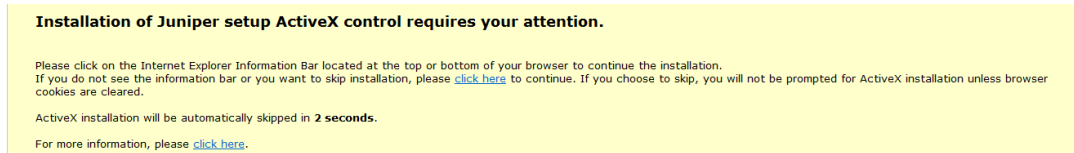

Karin gets a flash SMS with the Passcode “1CE6P5” and together with her personal PIN code, “4546” she gets a passcode+PIN combination, “1CE6P54546”.

She enters the total combination in the “Enter SMS Passcode directly followed by your PIN code” field and clicks “Sign in”.

Please note!

- The passcode+PIN combination can't contain a “space”
- The PIN code is always added at the end of the passcode
- The passcode+PIN combination is always 10 characters long

The first time you connect to access.teliasonera.com you'll get this message:

The service needs to install a web browser add-on, an ActiveX control.
Right-click the yellow bar that shows in your web browser...

...and chose "Run Add-on".

This window might pop-up:

Choose "Run"

Password change

The service access.teliasonera.com can handle a change of your TeliaSoneraID password. The change will start automatically if any of these three examples corresponds to your account:

1. You have forgotten your password and request a new one from the Service desk. You receive a new password and when you login you'll get prompted to change the password into something of your own choice. You may change your password once per 24h.
2. The validity period for your password have expired. It expires after 90 days.
3. You have received a consultant account with a temporary password. The first time you login you'll be prompted to change password.

This is what the password change looks like in your browser:

The screenshot shows a web browser window with a purple header containing the TeliaSonera logo and name. Below the header, the page title is "Connect to TeliaSonera". The main content area is titled "Change Primary Password" and contains three input fields: "Old Password:", "New Password:", and "Confirm Password:". Below these fields is a button labeled "Change Password".

**TeliaSonera web access**

Successfully changed password. Please enter your username and new password.
